

???

Does four years in a dental school give a dentist the moral right to exact from twenty to fifty dollars a day for his services when the electrician, carpenter, salesman and men of other vocations can only collect from four to seven dollars per day for their work?

True the experience they must gain to properly fit them for tuitions or time spent in the study of books, but it has cost them years of time notwithstanding as also sacrifice and effort, hence as much credit is due them for what they have accomplished as is due the dentist. If it is right for the dentist to receive prohibitive prices for his work, it is also right that the other fellow that has given up the same effort (only in a different way) should be equally as well compensated.

Our prices are honest, workingmen's prices, if you please.

We do not aim to get rich through the practice of dentistry, but our live and let live policy has long since demonstrated to our perfect satisfaction that "honesty is by far the best policy."

Some of our competitors who have got but little to do grow eloquent in denouncing us because we advertise and cut prices. They need not entertain a fear of being deprived of a livelihood if they are competent and honest.

Don't you know I believe that a policy of "live and let live" will do more toward qualifying a person for a hereafter than all the ethics that was ever taught or attempted to be practiced.

I BELIEVE THERE IS SUCH A THING AS AN ADVERTISER BEING SAVED! Dental ethics says NO!

What of the banker or merchant's chances who advertises and who professes Christianity? You would not buy of the merchant or deposit your money with a banker in whom you had no confidence.

We are living in a day of advertising; my prices are lower than the other dentists, and I want you to know it.

Call for a free examination of your teeth. To delay in this matter may mean a sacrifice of health and will assuredly mean added expense.

KEEP BATTERIES FROM FREEZING

"Your battery will freeze when not properly cared for," says Mr. Willoughby of the local Willard service station, "and should be tested by an expert at least once every two weeks. In this way your battery is never allowed to get below half charge, which insures you that it will not freeze in this climate. A battery at half charge freezes at 29 below zero. When a battery is allowed to get below half charge you are taking chances, as the electrolyte is being absorbed by the plates and the balance of the solution

will freeze at about the same degree of temperature as water. "A battery will discharge of its own accord in from six to eight weeks when allowed to remain inactive. When storing your car for a longer period than thirty days always remove your battery and place it in a reliable hands, where it will be kept up to charge or placed in dry storage.

"Probably one of the greatest savings to automobile owners who store their cars during the winter months is 'dry' storage. This method of storing is becoming quite popular among local motorists. In 'dry' storage the battery is taken completely down and the plates treated and stored away until you are again ready to use the car, at which time the battery is reassembled with new insulation and new acid, which insures its uninterrupted service during the driving season."

RED CROSS IS CALLED ON TO HELP POOR FAMILIES DURING COAL FAMINE IN THIS CITY

The Federal Fuel committee for Weber county has appealed to the Red Cross for help in alleviating the suffering caused by the lack of coal. A letter has been sent the local Red Cross, asking for co-operation with the fuel committee to see that the worthy people of the city, who have money, may be enabled to get the coal. The letter, which was addressed to Rev. J. E. Carver, president of the local chapter of the Red Cross, reads as follows: "Rev. John E. Carver, president of the Ogden chapter of Red Cross, Dear Mr. Carver: It is possible for your organization to get a car load of coal and put it on sale at cost to worthy persons who have little money, the service would be greatly appreciated by the members of our committee. We will make a special effort if you need our assistance to put a car at your disposal. The reason that we appeal to you at this time is that the class referred to is not in a position to fight its battles in these stormy times and we think it would be very charitable work and we surely think that the public at large as well as the class referred to, would appreciate the service. Our committee, as you doubtless know, is making every effort possible to have all the coal at this time, the weak as well as the strong. Thanking you for any aid you may be able to render along these lines and trusting that we are not imposing upon you too heavily, we are very truly yours."

Red Cross to Act. A meeting of the Red Cross is called for this afternoon, when the request will be considered. Rev. Carver stated that, in behalf of the Red Cross, he would say that the local chapter will gladly do all in its power to help and the meeting for this afternoon is not for the purpose of acceding to the request, but to complete plans for putting it into operation.

The fuel committee is now getting the required information in shape to go before W. W. Armstrong, state chairman and state exactly how many tons of coal are needed in Ogden.

Dr. Conroy said this morning that the Denver and Rio Grande, through general agent Frank Fouts, has informed the committee that by tomorrow or Monday Ogden may expect relief by way of a substantial shipment of coal. The Union Pacific has also assured the committee that it will cooperate in the work.

"The people are now responding nicely in sending in the information we seek," Dr. Conroy said. "At first, only those who were absolutely out of coal sent in the figures. Then those who had but a few pounds of coal got busy and now those who have plenty for their immediate needs are informing us. There are some, however, who have a good supply of coal stored, who do not say a word. We certainly appreciate the response of the people, when they were finally awakened to the fact that we mean business, for without them we could do nothing."

"In many cases, we have already helped the situation. Where we found those in immediate need of coal, we gave it to them, a sack at a time. We found several newcomers to the city who were unable to get coal and we did what we could for them. They seem to be among the greatest sufferers for fuel."

Ogden's Coal Needs. In compiling the figures gained from the letters sent in, the committee finds that from 579 customers of the coal dealers who have reported, there are but 559 tons of coal on hand, less than a ton for each. In many cases, these customers did not have any coal. It was found that 4361 tons are needed by these people to run them through the winter.

It was found that there are 6505 small residences in Ogden. Each of these will need an average of 5 tons of coal to last to March 1, or a total of 32,525 tons. Figuring 40 tons to a car, it will take 813 cars to supply Ogden homes with coal during this winter, with no cars in the city at the present time. These figures also show that in these homes there is an average of but three-fourths of a ton, with most of them entirely out.

Among the large consumers, such as stores, factories, hotels, etc., the number being figured at 990, there is on hand 900 tons, with the requirements for the winter amounting to 990 tons. Then there are the power plants, the sugar factories, the packing plants and other large concerns using power to the number of 209 who will have to be supplied with coal.

The committee urges that all those who have not sent in their figures do so today or tomorrow, as Monday will be too late.

The survey of the county homes and factories has been completed, under the direction of the Weber County Farm bureau. It was found that there are 815 small residences. Their needs are about the same as those in the city, but no coal whatever was found. The same condition exists in the factories, with comparatively few reporting any coal on hand.

Of the thirteen coal dealers in the city, but one of them has made any report whatever to the committee. If the committee had a complete report from them, it could now go before Mr. Armstrong with an approximate idea as to the amount of coal needed in Ogden.

NEW POWER PLANT COMMITTEE NAMED FOR BRIGHAM CITY ON UTAH PRODUCTS BUSINESS WEEK

BRIGHAM CITY, Nov. 3.—Engineer H. S. Kleinschmidt of Salt Lake, representing the Reclamation Power company, has filed on 25 cubic feet of water in Box Elder creek to be used from January 1 to December 31, inclusive, each year, for power purposes. It is proposed by the company to erect a power plant and furnish light and power in this city. It is proposed to divert the water at the head of Box Elder canyon in section 20 and convey it a distance of 5,300 feet by the means of a pipe line, and there use it for generating electric power. City officials contend that the granting of the application by the state engineer and the use of the water by the Reclamation company would interfere with the city's light plant, and therefore a protest will be filed by the city to the granting of the application for the appropriation of the water at that point.

Work on Brigham's new waterworks system will be started just as soon as the city learns of the successful sale of the bonds in the sum of \$80,000 just allowed in a recent election. In rebuilding the system and tapping the big springs recently purchased, the city will use over 15,000 feet of pipe ranging in size from 8-inch cast iron pipe to 21-inch sewer or concrete pipe.

CARD OF THANKS

To all who kindly assisted us during the illness and passing away of our beloved wife and mother we wish to express our heartfelt thanks and trust that kind friends may assist you in your hours of sorrow.

PHYSICIAN MAKES DISCOVERY

A new chemical mixture for burning sensation in the stomach has been discovered. This sensation is caused by fermentation of the food, resulting in sick headaches, indigestion and gas on the stomach. If treated as a fire and smothered with a powder it will eliminate the pain and distress.

After experimenting with several mixtures the physician says that Cave's Stomach Powder is the best and will relieve distress quicker than any other powder.

When this powder is taken, a cooling sensation in the stomach is felt, due to the antacid properties of this mixture. Purchase about four or eight ounces of this powder and take one level teaspoonful in a small quantity of warm water after meals. This will give wonderful results. Try it.—Advertisement—

CLEARING HOUSE BANKS.

NEW YORK, Nov. 3.—The actual condition of clearing house banks and trust companies for the week shows that they hold \$10,930,160 reserve in excess of legal requirements. This is an increase of \$5,376,940 from last week.

The organization of committees to handle the work of preparing for Utah Products Week, which will be observed in Ogden and elsewhere in the state November 11 to November 17, has been completed in Ogden by George W. Goddard, chairman of this district. One of the features of Utah Products week will be the banquet at the Weber club, to be given at 7 p. m. November 14, which will be attended by local merchants, state officials representing the business industries, and congressmen Milton H. Welling, who will deliver the address to Charles McAllister, president of the Utah Manufacturers association, will also speak at the banquet.

A meeting of the committees appointed will be held on Wednesday of next week at noon at the Weber club, for the purpose of outlining the campaign and starting work.

The committees appointed are the following: Retail grocers—G. A. Nicholas, chairman, T. B. Evans, Albert Coop. Publicity—W. E. Zuppann, chairman, A. T. Greenwell, Ogden Standard; Alonzo West, Ogden Examiner. Schools and churches—James Wotherpoon, chairman; Henry Stevens, Heber Sewerott, Jr. Banquet—H. L. Herrington, chairman; L. A. Ray, J. D. Leonard.

During Utah Products week Ogden merchants will be expected to display Utah goods, to sell Utah goods, and to demand that their patrons buy Utah goods. Ogden consumers are expected to buy Utah goods, to eat Utah goods and to talk Utah goods.

A prize of \$5 has been offered for the high school student who will write the best essay on Utah products, using the subject, "Buy Utah-Made Goods," and the best report of the activities of the school during home products week will also receive a \$5 prize.

STONE FLEET PLANNED TO BOTTLE UP WHOLE GERMAN NAVY

Map showing how concrete barges could be sunk to block U-boats and German battle fleet in home ports.

William Marshall, a British inventor, suggests the building of a concrete dike in the shallow waters of the North sea to curb U-boats and cut off Teuton naval bases. Patents have already been granted for a concrete craft that may be towed into position and then sunk.

PRACTICAL LESSON IN BUSINESS GIVEN STUDENTS

Practical methods of poultry raising, carpentry, business and banking methods are being taught the pupils of the State School for the Deaf and Blind. The boys of the deaf department had just completed the construction of four modern chicken coops. Then the boys were divided into five groups, each one in charge of a coop, there having already been one coop at the school. These coops have been stocked with thoroughbred Lechorn pullets, loaned to the pupils by the school for the experiment they are to perform.

The coops are rented to the boys at 50 cents a month and the youngsters are given full charge. It will be their duty to feed the chickens, collect and sell the eggs, keep the coops and runs cleaned and repaired and, in fact, do all they would do were they the sole owners. The eggs will be sold to the school at the prevailing market prices.

To float the enterprise, the boys of each station elected officers and treasurers. Yesterday, the five secretaries and treasurers were loaned \$10 each. This money they took to the bank and placed on deposit, getting the slips for filing away. The money was advanced them for the purpose of buying feed until the enterprise gets on a paying basis.

When the eggs are delivered, the boys will present a cash slip and charge the school for the eggs. At the first of each month these bills will be paid and the money placed in the bank. Then the boys will make the necessary entries in their cash books. All bills against the stations will be paid by check.

Superintendent Frank M. Briggs stated that not only will the boys acting as secretaries and treasurers get valuable instruction in this way, but the entire class as well. When the year is up, a meeting of the stockholders will be called, at which time the original loans of \$10, with the accrued interest, will be paid back, and a dividend declared on the profits. From previous experience this will be between \$30 and \$50.

IT'S just like running a good sewing machine. Saves you all kind of bother! A smooth running, satisfactory range, like your sewing machine, is not an accident or a matter of guess work. It is the result of months of study and experimenting and costs the maker thousands of dollars before it is perfected.

COLE'S Down Draft RANGE

is a smooth and perfect running machine for all kinds of cooking.

It kindles readily and without puffing. Its thin unbreakable malleable lids are ready almost instantly. It bakes evenly and quickly.

It does all these necessary and important things perfectly and caps the climax by requiring but two-thirds as much coal as the ordinary every-day range.

That is why you should have one in your home.

See the name "Cole's Down Draft" — on the high closet door — none genuine without it.
